I'm a new, but well-rounded web developer looking for an opportunity to take part in a team with experienced devs where I can learn and contribute

EXPERIENCE

Full Stack Developer, Red Sky Technologies, SF UT, Aug 2018—Sep 2019

- Automated our entire testing environment at the time in Selenium JS
- Redid the UI and developed several CRUD applications on the admin portal for VR Junkies and Private Label VR
- Developed and published a customer rewards and time tracking app `VR Junkies` for both IOS and Android devices
- Finished the development of a sales monitoring dashboard in electron that displayed real time sales data along with geo-locational visuals
- Rebuilt the UI on several parts of our video sales app `Vendoti` in React to land the sale of the MLM company Le-Vel

Front End Internship, Pattern, Lehi UT, November 2019

- Developed on proprietary software using React and React hooks
- Redid the UI for several parts of the application `Predict` using CSS grid and other modern technologies to reflect changes in the UI/UX developer mock ups
- Worked with previously developed REST api calls to dynamically update pages when typing in a search input box for products and companies
- Developed a React component that would show a clear button when there was a value, the clear button would remove value from input, and restore the page dynamically to show all companies or products
